

**Canyon Crest Academy Student Enrollment by Grade Level (latest released from 2014-2015)**

Grade Level	Students
Grade 9	645
Grade 10	489
Grade 11	420
Grade 12	437
<b>Total Enrollment</b>	<b>1991</b>

Our school prepares its students for the workforce in a number of ways. They have developed numerous partnerships with businesses in town to help with the school’s curriculum and program development. Likewise, they use professionals as guest teachers and part time instructors. Including community members in our School Site Council, parent foundation, and district committees, they strive to keep the curriculum meaningful and relevant to real world applications.

**2016-2017 Team Members by Grade Level**

	9th	10th	11th	12th	Total
Female	7	4	4	3	18
Male	27	9	13	9	58
<b>Total</b>	<b>34</b>	<b>13</b>	<b>17</b>	<b>12</b>	<b>76</b>

Many young students start out interested in science and technology but barriers are built throughout development. If we can find a way to engage kids throughout the middle school years and into high school, we all benefit from diversity in the science and technology industry. Participants in FIRST Robotics have a significantly higher likelihood to enter post-secondary education and pursue graduate level

studies. Our goal is to increase interest in STEM throughout our school community, enabling us to build future leaders and engineers who will change the world.
